PROFESSIONAL SUMMARY

Aspiring Full Stack Developer with hands-on experience in web and mobile application development using Java, React.js, React Native, SQL, and basic backend development. Strong problem-solving skills with a good understanding of Data Structures and Algorithms. Experienced in building projects through internships and academics. Eager to learn new technologies, work collaboratively, and contribute to developing efficient software solutions.

EDUCATION

B.Tech in Computer Science and Business Systems

Expected: May 2027(Academic Break: 2023–2024)

Sri Manakula Vinayagar Engineering College

CGPA- 9.14

High School Diploma:

Completed: December 2022

Centre Point School, Katol Road, Nagpur

TECHNICAL SKILLS

Languages: Java, HTML, JavaScript, SQL

SOFT SKILLS

Leadership, Problem Solving, Communication, Team Collaboration, Adaptability, Analytical Thinking

EXPERIENCE

Technical Intern — Datawise

August 2025 – Present

Email Automation using UiPath

- Developed an automated email notification system using UiPath that reduced manual effort by automating scheduled and event-driven communications, improving workflow efficiency and reducing processing time.

IRCTC Customer Feedback Dashboard (React.js)

- Developed a full-stack analytics dashboard for **IRCTC** to analyze **18,000+** customer survey responses with advanced filtering, role-based access, and interactive visualizations.
- Optimized data processing and frontend performance using React optimization techniques, implemented Excel report exports, and enhanced dashboard usability.
- Tech Stack:** React.js, Spring Boot, MySQL, REST APIs

PROJECTS

FasalRaksha – AI-Powered Crop Insurance Platform (TNWISE Hackathon 2026 – TANCAM)

- Developed a prototype crop insurance platform for digital claim submission with an interactive frontend and a secure claim verification workflow.
- Proposed an AI-based crop damage detection system using EfficientNet (CNN) along with GPS, timestamp, and image validation for fraud detection, and designed a scalable cloud architecture for future deployment.

Medication Reminder AI – Smart Healthcare Reminder System

- Developed a cloud-based medication reminder application with secure user authentication, medicine scheduling, and automated reminder notifications.
- Integrated AI-powered features to provide medicine-related assistance and designed a predictive model to identify users at risk of missing medication, with a scalable cloud architecture for future deployment.

CERTIFICATIONS

- Certified Full Stack Development – NIIT (June 2024 – Jan 2025)
- French Language Proficiency – A1 & A2, Alliance Française Chennai

LANGUAGES
